

Remote & Tally Option for LV 5380

In addition to the basic functions of LV 5380 Multi SDI Monitor, the new tally indication capability is optionally available to let you know which camera is being active.

The tally indicator can be remotely displayed on the screen when combined with the remote interface installed on the main frame rear panel.

Up to 30 preset conditions can be set.

Example of tally display

About Leader Electronics

Leader Electronics selects and focuses on the professional video area of digital TV, on specialized portions of the consumer electronics area, as well as on the optical disk area for DVD/CDs and on the flat panel display area for LCD/PDP in order to achieve effective management. The evolution of electronics is endless and it is the most important technology as there can be no industry without the use of electronics. With experience and history of 55 years, we are committed to being a leading company in the area of test instrumentation so that we can always develop new products that apply to new electronics applications.
