

## LV 7330SER02 /LV 5330SER02 PRESS RELEASE

Software for video signal measurements to display gamut errors and level errors

Jun. 16. 2010

Leader Electronics Corp. (Yokohama, Japan. Sighiko Hirota, president) introduces two types of optional software for the models LV 5330 and LV 7330 to display gamut errors and level errors.

With these optional software, the area and time can be set when detecting the gamut errors of the video signal. Likewise, the upper and lower limits of the luminance and chrominance signals can be set when detecting the level errors.

The software LV 7330SER02 is dedicated for the model LV 7330 Multi SDI Rasterizer, the software LV 5330SER02 is dedicated for the model LV 5330 Multi SDI Monitor.

### About Leader Electronics

Leader Electronics selects and focuses on the professional video area of digital TV, on specialized portions of the consumer electronics area, as well as on the optical disk area for DVD/CDs and on the flat panel display area for LCD/PDP in order to achieve effective management. The evolution of electronics is endless and it is the most important technology as there can be no industry without the use of electronics. With experience and history of 55 years, we are committed to being a leading company in the area of test instrumentation so that we can always develop new products that apply to new electronics applications.
