

Model Name: MULTI SDI MONITOR

Model No.: LV 5980

17-inch Color LCD Waveform Monitor Introduced

[Description]

Leader Electronics Corp. (Yokohama, Japan. Shigehiko Hirota, president) introduces the LV 5980 17-inch TFT Color LCD Waveform Monitor

Since the LV 5980 Waveform Monitor can simultaneously monitor up to four SDI signals, this model is suitable for controlling the output level of multiple cameras.

The video waveforms, vector patterns, or pictures can be displayed in superimpose or side-by-side format.

The tilt stand is sold separately.

The embedded audio signal, transmission error, and gamut of the SDI signal converted into Y, CB, CR format, GBR format, or component format can be displayed in 5 BAR mode-displaying data with five bars.

The following capabilities are also provided:

The 3D ASSIST mode is suitable for 3D video applications.

The CINEZONE mode (patented) is useful to check the evenness of screen brightness at a glance.

[About Leader Electronics]

Leader Electronics selects and focuses on the professional video area of digital TV, on specialized portions of the consumer electronics area, as well as on the optical disk area for DVD/CDs in order to achieve effective management. The evolution of electronics is endless and it is the most important technology as there can be no industry without the use of electronics. With experience and history of 57 years, we are committed to being a leading company in the area of test instrumentation so that we can always develop new products that apply to new electronics applications.
