We would like to take this opportunity to thank you for your continued patronage. We are pleased to announce the addition of new functions to the following products.

- Product name: ZEN series waveform monitors and rasterizers
- Model numbers: LV5600, LV5300A, LV5300, LV5350, LV7600, LV7300
- Release date: End of March 2024

## **ZEN Series Free of Charge Update Adds New Features**

Leader Electronics Corporation (President: Kozo Nagao) is pleased to announce a free update of the ZEN series waveform monitors and rasterizers with new features. The new functions are as follows

- 3D-LUT function  
By loading a 3D-LUT cube file, the 3D-LUT can be converted in real time to support various measurements and conversion outputs. It also supports HDR and BT2020 conversion. (LV5600/5300/5350/7600/7300SER23 option is required.)
- Supports full range of SDR  
Supports waveform display, vectorscope, CIE chart, histogram, CineLite, CineZone, and full range of DPX and TIFF file capture.
- False Color Display Support  
False color display can be added to pictures, making it easy to determine highlights, human skin tones, 18% gray, blacks, etc.
- Timecode continuity monitoring function
- Supports SDI and IP (ST2110-40, ST2022-6) time code continuity monitoring and time code and date display.
- Closed Captioning (CC) language extension (CC608, CC708, OP47)
- Source ID display
- Diversified IP audio channel mapping (only with LV5600SER06/LV7600SER06)
- Audio channel mapping function allows multiple channels to be freely assigned in 2-channel pairs.

\*New functions will be supported in ZEN series software Ver. 7.5.
