1 SPECIFICATIONS

1.1 Description

The LV 58SER20 is a dedicated output unit for the Leader LV 5800 (MULTI MONITOR) and LV 7800 (MULTI RASTERIZER). By installing it, you can output the LCD panel display to an external monitor.

1.2 Features

The LV 58SER20 is equipped with a DVI-I connector, which can be used to output the LV 5800/7800 display to an external monitor.

The DVI-I connector provides both digital and analog outputs allowing the signal to be used on a wide variety of XGA-compatible monitors.

1.3 Specifications

1.3.1 DVI-I Connector

Signal Format	Single Link T.M.D.S Analog RGB
Display Format	XGA (Effective area 1024 × 768 dots)
DDC Function	Not supported
HOT PLUG Detection Function	Not supported
Output Connector	DVI-I 1 system

1.3.2 General Specifications

Environmental Conditions	Same as the LV 5800/7800
Power Requirements	Supplied from the LV 5800/7800 5 W max.
Weight	0.2 kg
Supplied Accessories	Instruction manual..... 1

2 PANEL DESCRIPTION

Figure 2-1 illustrates the rear panel of the LV 58SER20.

Figure 2-1 DVI-I connector

An output connector that supports both TMDS serial digital output and analog RGB output. The LV 5800/7800 display is output from the DVI-I connector. Connect the output to external monitor or other similar devices.

3 PROCEDURE

Connect the DVI-I connector to an XGA-compatible external monitor.
The LV 5800/7800 display is shown on the external monitor.
