Leader Electronics Corporation. JASDAQ 6867  
2-6-33 Tsunashima-Higashi, Kohoku-Ku,  
Yokohama

Thank you for your continued support for us at all times.

We are introducing the highlights of NAB SHOW 2018 which will be held in Las Vegas, USA from 9th to 12th April.  
We are pleased if you can introduce us at your company "NAB Feature" etc.

■ Booth Number. : **C8008**

## New products to be announced at NAB SHOW 2018

Leader Electronics Corporation will announce the new lineup "ZEN" series of waveform monitors and rasterizers at NAB SHOW 2018.

ZEN consists of four models: a hybrid type waveform monitor, LV5600 / rasterizer LV7600 corresponding to inputs up to 12G-SDI signal and IP signal and a compact type waveform monitor, LV5300 / rasterizer LV7300 specialized for SDI signal.

LV5600

The LV5600 is a 3U half rack size waveform monitor equipped with a 7-inch touch panel, and the LV7600 is a

1U full rack size rasterizer. It supports SDI (SD to 12G) and IP signal.

This product has various measurement monitoring functions ranging from video to audio and IP transmission. In the video signal measurement, it corresponds to CIE chart, eye pattern display, HDR measurement, etc., and audio signal measurement supports level, lip sync, loudness measurement and so on. In IP signal measurement, transmission quality (QoS) monitoring functions such as transmission error monitoring and packet jitter measurements are enhanced.

The LV5300 is a waveform monitor that is battery-operable and portable, the LV7300 is a space-saving rasterizer of 1 U half rack size.

The ZEN series is totally configurable according to customer's intended use and environment by option selection.

In addition, a sync generator LT4611 will be exhibited as a new product. It is equipped with redundant power supply as standard, and it is a product that can customize functions from various options such as 12G-SDI output, PTP, GPS lock, time code and so on.

The new product introduction page will be placed later.
