PRESS RELEASE

## **Leader Electronics and Bridge Technologies Sign Global Distribution Agreement**

Yokohama, Japan, Leader Electronics Corporation, a globally active producer of high-grade test and measurement solutions, announces the signing of a distribution agreement with Bridge Technologies. Effective from May 1, Leader Electronics Corporation and its global channel partners will resell Bridge Technologies IP video and audio network analysis and monitoring solutions into the worldwide broadcast market.

Based in Norway, Bridge Technologies offers a wide range of products designed to check quality-of-service and quality-of-experience on the data delivery performance and production systems by evaluating jitter, packet-loss, true latency and throughput.
